Automation has a powerful business rule and transformation engine that helps to validate, and triage extracted data.

### **Sanlam- Kwaito- DevOps — 26/12/2017 –30/04/2019**

**Composite Framework** – Worked as application developer. Working on Spring Boot, and Java 1.8, MSSQL DB. Project was part of Sanlam's change in methodology from Waterfall to Agile with continuous delivery to client. This project involved designing and development of a custom-made Test Data management Solution to the Users inside Sanlam which uses the Application.

### **Goods and Service Tax — 06/06/2017 –08/12/2017**

**Focuz Group of Companies** having four companies and all of these having different ERP Solutions. All of these ERP Solutions were designed and runs on single tax system. We are restructured and re implemented the software according to Goods and Service Taxes. Various modules of application get changed are as follows. Inventory, Purchase, Sales, Stock Transfer Advice, Pricing, Service, Accounts. All the Invoice forms and Service Bills are modified. Invoice format and bills format are designed as per the Central Government rules and regulations. Internal reports and registers are modified as per the directions of internal auditors. All new External reports GSTR1, GSTR2, GSTR3 are designed and created as per the format given by Central GST Council.

### **TechFocuz Parts Mart — 12/02/2015 –05/06/2017**

**TechFocuz Parts Mart** is an ERP Solutions for Focuz Parts Mart. It maintains centralized stock and tracks each item so that it is able to fetch stock status and item status online. The pricing mechanism allows to set price effectively that helps to ensure the profit. It provides all sorts of reports to assess the daily activities as well as to analyses whether it meets the predefined specifications, if it does not meet then helps to take corrective steps. Various modules of application are Inventory, Purchase, Sales, Stock Transfer Advice, Pricing, Service, Accounts and HRMS.
