Experience

SR. SOFTWARE DEVELOPER | BRAVVOX | APR 2021 – PRESENT

- Creating and maintaining microservices.
- Working on REST APIs, Business logic and Database interacting code.
- Integrate with external repositories and Databases - **Mysql, RabbitMQ, HiveAI, Vault, MinIO**, etc.
- Writing Unit tests and Integration tests.
- Participating in System Design discussions.

SOFTWARE DEVELOPER | ALAWWAH DIGITAL & AI | SEPT 2019 – APR 2021

- Creating RESTful and gRPC Microservices, APIs in GoLang - Gorilla, and HTTP Framework.
- Integrate with external repositories and Databases - Relational and NoSQL.
- Collaborate with front-end developers.
- Continuous Integration using Github, Jenkins and Docker.
- Actively participated in System Design/Architecture discussions.
- Designed and maintained API Proxy-Gateway using Envoy.
- Worked with RabbitMQ messaging server for Inter-microservices communication to establish Event-driven Microservices.

SOFTWARE DEVELOPER | CODICE DEV | NOV 2017 – AUG 2019

- Develop REST APIs in Django.
- Implemented Security and data protection.
- Definition and maintenance of databases, and the ensuring of high performance and responsiveness to requests from data clients
- Integrate data storage solutions like MySQL, MongoDB, PostgreSQL.
- Development of server-side logic in Python.
- Assisted clients on call and provided remote support to address technical issues.

Skills & Abilities

- Experience with **Golang, Python-Django, MySQL, PostgreSQL, MongoDB**.

- Experience with Go Libraries: **Gorm, Gin Framework, Gorilla, Testify, GoMock, Zap, jwt-auth,**
- Experience of Event-Driven Microservices Architecture. **NATS, RabbitMQ, Celery Queues**
- Experience working with Relational Databases.
- Knowledge of user authentication and authorization between multiple systems, servers, and environments.
- API gateways, Load Balancer, Rate Limiting using **Envoy.**
- Experience designing and developing using microservice architectures.
- Containerization using **Docker** and Container orchestration using **Kubernetes** (K8s).
- Experience with **gRPC.**
- REST API - Consuming Rest services on Mobile and Web Platforms.
- Understanding of MVC, MVVM, and MTV design patterns, Hexagonal architecture.
- Good knowledge of **Git, MySQL, PostgreSQL, SQLite.**
- Good understanding of different TCP/IP networking protocols **TCP, UDP,** and various application layer protocols.

Education

BACHELOR OF TECHNOLOGY IN COMPUTER SCIENCE & ENGINEERING, 2017, IUST J&K INDIA

- Software Development
- Artificial Intelligence
- Mathematics and Science
- Networking

Languages

English, Kashmiri
